We've located these workshops in areas that facilitate easy access for the greatest numbers of potential applicants, as identified by the Letters of Intent. Attendees should plan for the sessions to take about 1.5 - 2 hours - with plenty of opportunities for questions and participation. **Please RSVP to William Rose** (contact info below) **1 week prior to the session you plan to attend.** Please note that at least one representative who will serve in a managerial role for your potential project **must** attend one of these workshops in order for your project to be eligible to submit an application in September.
